

NAME

groff_me – troff macros for formatting papers

SYNOPSIS

groff -me [options] file ...

groff -m me [options] file ...

DESCRIPTION

This manual page describes the GNU version of the `-me` macros, which is part of the groff document formatting system. This version can be used with both GNU troff and Unix troff. This package of *troff* macro definitions provides a canned formatting facility for technical papers in various formats.

The macro requests are defined below. Many *troff* requests are unsafe in conjunction with this package, however, these requests may be used with impunity after the first .pp:

```
.bp    begin new page
.br    break output line here
.sp n  insert n spacing lines
.ls n  (line spacing) n=1 single, n=2 double space
.na    no alignment of right margin
.ce n  center next n lines
.ul n  underline next n lines
```

Output of the *pic*, *eqn*, *refer*, and *tbl* preprocessors is acceptable as input.
