

NAME

cgred.conf – libcgroup configuration file

DESCRIPTION

cgred.conf is cgred service configuration file. In this file there could be defined several internal values. Defining anything else in this file will cause the CGroup Rules Daemon program to fail.

CONFIG_FILE

specifies the configuration file for cgred service

LOG_FILE

variable specifies the file to which logs will be written (by default they are not sent to a file but to syslog)

NODAEMON

if it is equal to "--nodamon" then run cgred in non-daemon mode

LOG define the verbosity of logging. Accepted values are '-v', '-vv', '-q' and '--nolog'.

FILES

/etc/cgred.conf

default libcgroup configuration file
