

**NAME**

power-status-changed – event signalling change of power status

**SYNOPSIS**

**power-status-changed** [*ENV*]...

**DESCRIPTION**

The **power-status-changed** event is generated by the Upstart **init**(8) daemon when it receives the SIGPWR signal, this has been typically generated by UPS monitoring software such as **powstatd**(8)

This event is not handled in the default Upstart configuration.

**EXAMPLE**

A task to be run on change of power status might use:

start on power-status-changed
