

NAME

securetty – file which lists ttys from which root can log in

DESCRIPTION

The file */etc/securetty* is used by (some versions of) **login**(1). The file contains the device names of tty lines (one per line, without leading */dev/*) on which root is allowed to login. See **login.defs**(5) if you use the shadow suite.

FILES

/etc/securetty

SEE ALSO

login(1), **login.defs**(5)

COLOPHON

This page is part of release 3.22 of the Linux *man-pages* project. A description of the project, and information about reporting bugs, can be found at <http://www.kernel.org/doc/man-pages/>.
