NAME

texinfo – software documentation system

DESCRIPTION

Texinfo is a documentation system that uses a single source file to produce both online information and printed output. It is primarily designed for writing software manuals.

For a full description of the Texinfo language and associated tools, please see the Texinfo manual (written in Texinfo itself). Most likely, running this command from your shell:

```
info texinfo
```

or this key sequence from inside Emacs:

```
M-x info RET m texinfo RET
```

will get you there.

AVAILABILITY

ftp://ftp.gnu.org/gnu/texinfo/
or any GNU mirror site.

REPORTING BUGS

Please send bug reports to bug-texinfo@gnu.org, general questions and discussion to help-texinfo@gnu.org.
