NAME

abrt-oops.conf − Configuration file for ABRT´s Kernel Oops extractor

DESCRIPTION

The configuration file consists of items in the format "Option = Value". The following items are recognized:

DropNotReportableOopses = *yes* / *no* If you want to see only reportable oopses, set to "yes". Default is *no*: do not drop them.

OnlyFatalMCE = *yes* / *no* If you want to see only fatal MCEs, set to "yes". Defaults is *yes*: detect only fatal ones.
